Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claims 16-20 are object to because the claims are method of making claims, but the claims fail to disclose any method steps. The claims only disclose structure. The examiner suggests adding some method of making steps or limitations.

Appropriate correction is required.

Claim Rejections - 35 USC § 102

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

1. Claims 1-7 and 10-25 are rejected under 35 U.S.C. 102(b) as being anticipated by Vermed (FR 2757405).

Vermed disclosed a hypodermic needle used with a hypodermic syringe, wherein the needle comprises a hollow tube having an angled end with respect to a longitudinal axis of the tube, the end having an opening surrounded by an external peripheral rim, and where the external peripheral rim is beveled back at least 50%, to form an internal beveled surface, as well as the method of making the needle and a method of use (Figure 2, 3a and entire reference).

As to claim 6, wherein the internal beveled surface is curved (Figure 2, and entire reference).

Response to Arguments

2. Applicant's arguments filed 11/22/04 have been fully considered and are persuasive to overcome the 103 rejections with regards to Doyle and Gravlee.

With regards to Vermed, the examiner disagrees. Figure 2, 3a show the claimed invention, because both figure show a straight bore. This can be seen in the picture below.

The examiner would also like to note that the independent claims are unclear and would like clarification or an amendment because the claims could be interpreted as the outer surface at the distal end near the piercing tip is the surface that is beveled from the outer surface (tip) towards the bore and not the outer surface opposite the piercing tip. This interpretation is the reason for applying figure 3a in Vermed.

Conclusion

3. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within

Art Unit: 3763

TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
